### DETAILED ACTION

1. The amendment filed June 30, 2003 has been entered.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 37, 38, 41, 42 and 45 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Andrews, pn 156,748.

#### *Claim Rejections - 35 USC § 102/103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

5. Claims 39, 40, 43 and 44 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Andrews, pn 156,748.

Andrews discloses a cutting device with every structural limitation of the claimed invention including the claimed angle differences.

In the alternative, if it is argued that Andrews does not explicitly disclose the angles and thus does not disclose the differences in the angles, the Examiner takes Official notice that to provide a plurality of teeth on a cutting device wherein the teeth are significantly different and include angles that differ by at least 3 degrees and at least 10 degrees is old and well known in the art for various known benefits such as for providing progressively-shaped teeth to perform progressive cutting operations. Therefore, it would have been obvious to one having ordinary skill in the art to provide teeth having different configurations with the claimed angle differences for the well known benefits including that described above.

#### ***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3724

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
